4-4 Assignment: UI Design

1. Login/Signup Screen:
   ● Simplicity: The design is straightforward, featuring simple elements
   ● Clarity: Large, clear text labels make it easy for users of all ages to understand
   ● Intuitive Navigation: The separation between login and create options is clear, reducing potential confusion for first-time users.
2. Main Dashboard (Creating Events):
   ● Focus on Functionality: A simple list view shows the events, prioritizing functionality and ease of access. This aligns with the Android design principle of simplicity.
   ● Important 'Done' Button: Placed centrally for user interaction, making creating an event accessible.
   3. Notifications Screen (Viewing Events):
   ● Organized List View: Events with notifications are listed clearly, allowing users to scan and identify important updates quickly.
   ● Intuitive Icons: Simple icons beside each notification enhance visual recognition and user engagement.
   ● User Control: The design provides easy access to notification settings, empowering users to customize their experience.

New Features and Solutions is to design adaptable screens to different sizes and make the screens look more linked together, avoid user challenges, and ensure user experience across Android devices.
